INTRODUCTION

The center sector scheme "**Timely Reporting Scheme**" is being implemented in the state since 1972-73 which aims to arrive at quick and reliable Estimates of Area under Principal Crops . District wise area under selected principal crops has been estimated based on the data from sample villages for all the three seasons during the year which constitute 20 percent of total villages. The present publication provides district-wise precise and advance estimates of area under principal crops as worked out by the two methods of estimation namely Ratio and Un-biased methods.

I am sure that this publication would be very useful to all and particularly will help the policy makers and researchers for detail analysis of estimates of area under principal crops.

REPORT ON TIMELY REPORTING SCHEME FOR AREA ESTIMATE ON PRINCIPAL CROPS IN RAJASTHAN 2015-16

1. INTRODUCTION: The Timely Reporting Scheme (TRS) sponsored by Government of India is being implemented in the State since 1972-73. Under the scheme, it is intended to arrive at quick, reliable and accurate estimates of area immediately after the sowing of principal crops at the end of each agricultural season viz. Kharif, Rabi and Zaid Rabi in the State on the basis of actual area enumeration in the selected twenty percent villages through sample survey. These estimates serve the Government to assess agricultural prospects during the current year and to take quick policy measures relating to agricultural production, imports and exports of the agricultural commodities.

2. OBJECTIVES:

The main objectives of the scheme are:

- (a) To obtain reliable and statistically precise estimates of area under principal crops immediately after sowing;
- (b) To build estimates of area under principal crops for irrigated and unirrigated categories separately;
- (c) To build estimates of area under traditional and high yielding /hybrid varieties of crops separately.

3. COVERAGE: The agricultural year in the State covering the period from 1st July 2015 to 30th June 2016 is divided into three seasons viz; Kharif, Rabi and Zaid Rabi. Season-wise main crops reported are as follows:

| Season | Crops Covered |
|---------------|--|
| (a) Kharif | Rice, Jowar, Bajra, Maize, Cotton, Tur, Sesamum, Castorseed, Sugarcane, Soyabean and Groundnut, |
| (b) Rabi | Wheat, Barley, Gram, Rape Seed & Mustard, Taramira and Linseed |
| (c) Zaid Rabi | Jowar, Bajra, Gram, Urad, Moong, Moth, chaula, Fruits & Vegetables, Tobacco, Small millets, Spices and Fodder. |

In Ganganagar and Hanumangarh district, one additional crop namely Toria is grown in Zaid Kharif season.

4. PERIOD OF CROP

ENUMERATION: In the Land Record Manual, provision has been made for advancement of Girdawari by 15 days for the villages selected

under Timely Reporting Scheme. The time schedule for crop enumeration prescribed for Patwaris in TRS villages in each agricultural season was as follows:

| SEASON | CROP ENUMERATION PERIOD |
|----------------|---|
| 1. Kharif | 01 st to 08 th September 2015; |
| 2. Zaid Kharif | 01 st to 15 th January 2016; |
| 3. Rabi | 16 th to 23 rd January 2016 and |
| 4. Zaid Rabi | 01 st to 10 th May 2016 |

5. SAMPLING DESIGN: For the survey, 20 percent villages in each tehsil in each agricultural year are selected by adopting linear systematic sampling method treating each tehsil as a stratum. For selection of villages, all the villages in each district are arranged according to tehsil, I.L.R. Circle and Patwar Circle in a random order respectively for preparing a sampling frame to select the sampling unit.

The selection of 20 percent sample villages in each district is made by systematic sampling technique from the sampling frame stated above with an interval of five sample units and with a different random start adopting non-over-lapping sampling procedure. Sample villages, thus, selected separately for each district are being used as one set for each year starting from the year 2012-13, covering all the villages in the State in five years i.e. By the year 2016 -17. This report is based on the

data collected in the fourth set of villages in the year 2015-16 i.e. fourth year of the round.

6. SAMPLE SIZE: In all 9,446 villages were selected for the year 2015-16. These villages were retained for all the seasons for area enumeration.

7. ORGANISATION: The survey was organized by the Directorate of Economics and Statistics through its staff posted under the scheme both at State, District and Block headquarter level. The fieldwork was assigned to the patwaries of the Revenue Department. In order to improve the quality of field work and to study the type of mistakes committed by the patwaries, supervision of field work was entrusted to National Sample Survey Organisation, besides, the District Statistical Officers and their staff under the Improvement of crop statistics(I.C.S.)scheme.

8. TRAINING: The District Statistical Officer in the district were responsible for imparting training to Office Kanungos and Inspector of Land Records regarding the procedure to be followed in the area enumeration work and

reporting the crop acreage in prescribed girdawari forms. In turn they imparted the training to the Patwaries in their respective tehsils for the work pertaining to this scheme. During the year, the training was organised alongwith the crop estimation survey training at district headquarters in the month of September 2015 and January, 2016 for Kharif and Rabi season respectively.

9. FORMS FOR REPORTING AREA:

Separate forms are prescribed for all the three seasons for reporting the area under crops, irrigated and un- irrigated for both the current as well as last year for the selected villages along with the instructions for filling them. The prescribed form of area enumeration has been divided into two sections. The first section relates to the general identification particulars of the villages. The second section is meant for recording the irrigated and un irrigated area under individual crops for both the current and last year in hectares up to four

decimal places. Patwaries are also required to record the conversion factor from local units to hectares.

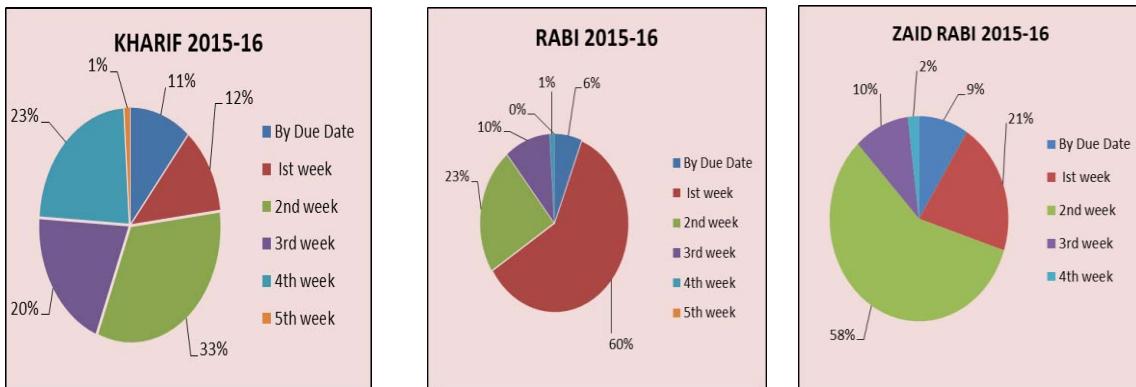

10. COLLECTION AND COMPILATION OF DATA: The Tehsildars were instructed to hold the meeting of the Patwaries immediately after the completion of the field work and collect all the filled-in-schedules for onward transmission to the Block Economics and Statistics office. These schedules were scrutinized and data entered on TRS web Portal immediately after collection of TRS schedule at block statistical office.

11. RESPONSE: The title of the scheme i.e. Timely Reporting Scheme it self signifies that the activities of the scheme are time bound. Total 9,446 villages in the State were selected under this scheme for undertaking the study in each season. Out of which, 9261, 9350, and 9173 filled-in-schedules were received in Kharif, Rabi and Zaid Rabi season which was 98.04, 98.98 and 97.11 percent response respectively. The details of filled-in-schedules received by due date and those received after due date but within subsequent weeks are given below:

Response Position of filled-in-schedules at Different Time lags

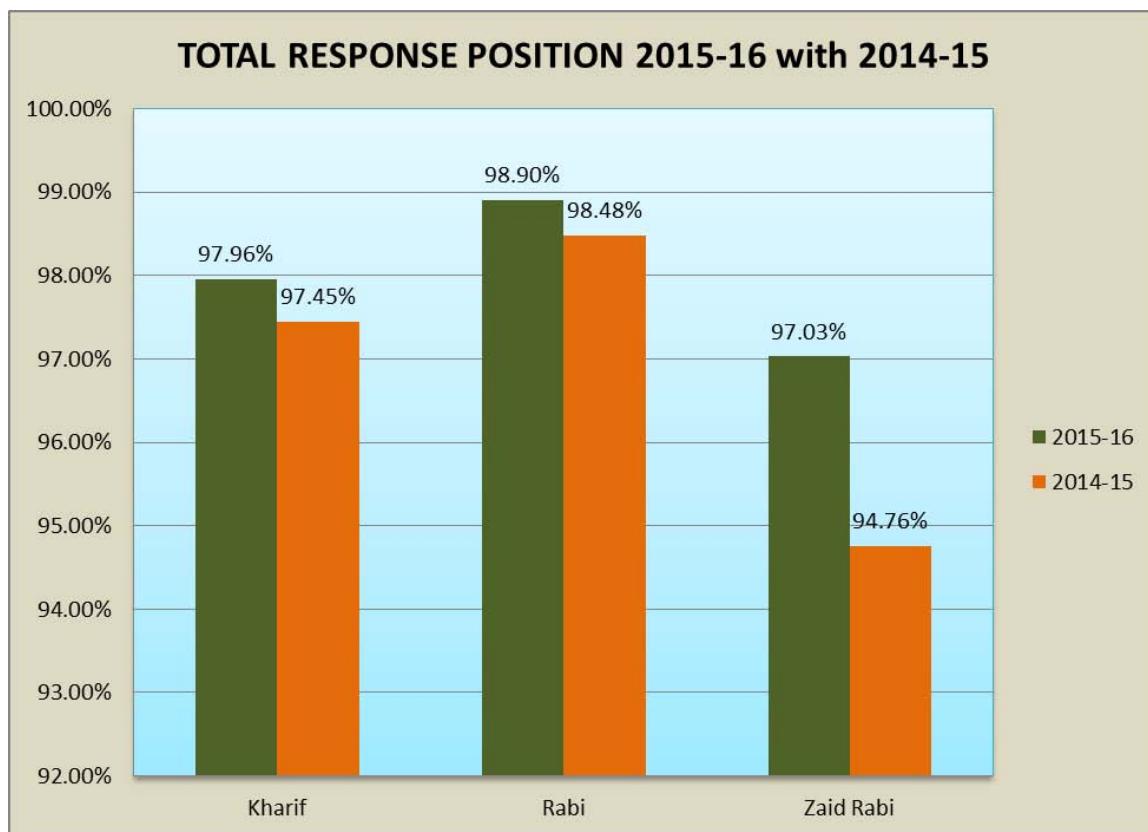

| S.No. | Particulars | Kharif | Rabi | Zaid Rabi |

Response Position of filled-in-schedules at Different Time lags

It can be seen from the above table & below chart that the response in the submission of filled-in-schedules was higher side in the Kharif,Rabi and Zaid Rabi season of the year

2015-16 when compared with that of the year 2014-15. District-wise response position of filled-in-schedules for the selected villages is given in Appendix-1.

The variation in estimates of area prepared under Timely Reporting Scheme i.e. by Ratio and Unbiased method as compared to area enumeration given in final forecast is largely within 10 percent of variation except for crop Linseed. District-wise estimates of area under principal crops are given in Appendix 2 to 18.

14. ESTIMATES OF AREA UNDER HIGH YIELDING VARIETIES:

The estimates of area under high yielding varieties were also prepared on the basis of information collected under the high yielding varieties of the crops. State level estimates of area are given as follows:

Area under High Yielding Varieties

(Area in '00 Hectares)

| S.No . | Crop | Ratio Estimates | | Total | Unbiased Estimates | | Total |

15. SAMPLING ERROR: The percentage sampling error associated with the estimates of

area for the principal crops at the State level under the Ratio and Unbiased estimates are given below:

Percentage Sampling Error

| Season | S.No. | Crop | Percentage Sampling Error | |

| | 16. | Taramira | 7.85 | 8.80 |
| | 17. | Linseed | 20.37 | 12.21 |

Above results of sampling errors reveal that the estimates of area are within the tolerance limits except for crop Linseed Where sampling error is found more than ten percent. The District-wise and Crop-wise percentage sampling errors for Kharif and Rabi season are given in Appendix-20 and 21.

16. SUPERVISION: To obtain precise estimates of area of principal crops sown in each season and to improve the quality/reliability of the field data

collected, sample checks of area enumeration and aggregations were conducted by the technical staff of the National Sample Survey Organization and State Statistical Agency in the selected villages in each season.

Out of the 20 percent villages selected for Timely Reporting Scheme, a sub-sample of 300 non-overlapping villages each for State Statistical staff (state sample) and National Sample Survey Organization staff (central sample) were drawn for supervision. The selection of villages was done by N.S.S.O. office. The supervision was conducted just after the prescribed TRS area enumeration period and carried out in a month time after the due date for submission of the TRS statements.

The supervision carried out was related to (i) sample check on area

enumeration and (ii) checking of page totals of Khasra register. Under the sample check on area enumeration, physical verification of crops sown as reported by patwaris was done in four clusters each of five survey numbers in each selected village. The supervisors verified (a) Area of crop reported, (b) Identification of crop sown, (c) Irrigation status and (d) Use of high yielding varieties.

Findings were recorded in inspection schedule A.S. 1.0. Page totals of Khasra register were also checked to find out the discrepancies between the entries of area under land use as reported by patwaris and those obtained by supervisors through simple totaling of the area figures in the Khasra register were recorded in inspection schedule A.S. 1.1. The details of supervision are as follows:

Number of village allotted and supervised

| S.No. | Agency | Season | Number of Villages | | | |
|-------|--------------------------------------|--------|---------------------|---------|---------------------|------------|
| | | | Inspection Schedule | | Inspection Schedule | |
| | | | A.S.1.0 | A.S.1.1 | Allotted | Supervised |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1. | State Statistical Officials | Kharif | 300 | 292 | 300 | 291 |
| | | Rabi | 300 | 299 | 300 | 299 |
| 2. | Central (NSSO) Statistical Officials | Kharif | 300 | 300 | - | - |
| | | Rabi | 300 | 300 | - | - |

The District-wise details of supervision done by State Statistical Bureau and National Sample Survey

Organization are given in Appendix-26.

17. RESULT OF SUPERVISION:

A study of the inspection schedules help to find out the extent of differences between the area figures reported by patwaris and as observed by supervisors. On the basis of above ratio i.e. supervisor entries over patwari entries were calculated both for sample check on area enumeration based on schedules A.S.1.0 and page totals of

Khasra register based on schedule A.S.1.1 for each district and crop separately for the state, central and pooled samples.

The district-wise and crop-wise variations found on the basis on these inspection schedules are given in Appendix 22 to 25. These variations at the State level are given below:
